PREFACE

Statistics in this publication include bulk steamer, ocean barge, ferry, and plane unloads of most agricultural products from sources outside the State and from the outlying islands, as well as marketings from the island of Oahu. Although direct imports made by the Armed Forces are excluded, quantities sold to commissary stores and sales to the Armed Forces by local dealers are included. Supplies of fresh fruits and vegetables from the State include quantities for fresh market as well as processing, and also outshipments from the State. Several items of minor importance are excluded, and taro for poi manufacture is grouped with miscellaneous commodities. Marketings of poultry products include those from commercial producers with flocks of 100 or more birds; dairy and swine products are from farms with herds of 10 or more head. Unload data on meats do not include meats in any processed form.

Explanation of Data in Summary Tables

Fruits and vegetables of minor importance were omitted in Table 1; the quantities given include only those commodities listed in Table 1, page 9. Data generally have been rounded to thousands of pounds, except for eggs and livestock. Dressed poultry data are on an eviscerated basis for easier comparison of quantities received from the several sources. Oahu slaughter of hogs includes animals imported from the Mainland as well as unloads from the outer islands, and therefore does not signify that all hogs slaughtered originated on Oahu farms. Cattle and sheep slaughter include animals raised on the neighboring islands.

In the index charts, the year 1950 has been selected as a base because it was least affected by factors that would tend to distort the normal flow of supplies. As will be noted from the tables, the trend of total supply of produce and most livestock products has been upward during the period. Tourists and Honolulu population have increased consistently during the past 5-year period.

ACKNOWLEDGMENT

The Federal-State Market Report work was made possible through the cooperation of the Agricultural Marketing Service, U.S. Department of Agriculture, and the University of Hawaii Agricultural Extension Service. The Agricultural Extension Service gratefully acknowledges the assistance of all those who contributed information. Steamship, barge, ferry, and air transportation companies furnished the unload data; records of Oahu truck receipts were obtained from wholesalers. The Federal-State Market Report data were compiled by Keiji Tsugawa and Ellen Taki, statistical clerks.

5-YEAR SUMMARY OF HONOLULU MARKET SUPPLIES

Fresh and Frozen Fruits and Vegetables

In 1959, a total of 117 million pounds of fresh fruits and vegetables were marketed in Honolulu. Despite the steady rise in population and the fact that in 1959 there was no prolonged inclement weather to reduce fruit and vegetable production throughout the state, the Honolulu market supply was 2.7 million pounds less than in 1958.

Mainland and foreign imports declined by nearly 1 million pounds, and state marketings decreased by almost 2 million pounds.

Forty-four percent of the total volume marketed in Honolulu in 1959 consisted of Island-grown produce; about 54 percent was from the Mainland, and about 2 percent from foreign countries.

Since 1955, in-shipments of fresh produce from the neighbor islands have steadily increased. In 1959, for the first time, neighbor-island farmers have taken the lead in volume of fresh fruits and vegetables marketed in Honolulu, supplying about 26 million pounds. Oahu farmers marketed 25 million pounds.

In-shipments of frozen fruits and vegetables totaled 2.5 million pounds, 11 percent more than in 1958. All were imported from the Mainland. The convenience of frozen products and their moderate price make them competitive with some fresh fruits and vegetables.

Selected Dairy Products and Margarine

The total volume of fresh milk marketed in Honolulu was 96.5 million pounds in 1959, slightly less than in 1958. Practically all fresh milk marketed in Honolulu was from Oahu milk producers.

Compared with 1958, there was no significant change in butter imports in 1959, but cheese and oleomargarine imports have increased.

Poultry Products

Eggs. The total volume of fresh eggs marketed in Honolulu in 1959 was 338 thousand cases (30 dozens to a case), 17 thousand more than in 1958. About 76 percent were of state origin and about 24 percent were from the Mainland.

In 1959, Oahu's egg output increased by 6.2 percent over 1958, while neighbor-island output decreased by 3.3 percent. The volume of Island-produced eggs marketed in Honolulu in 1959 showed a net increase of over 9 thousand cases, representing a 3.8 percent increase over 1958.

Mainland egg imports increased by 10.3 percent over 1958. In both 1958 and 1959, there were no egg imports from Australia.

The combined Island and Mainland egg marketings in Honolulu have shown a gradual upward trend between 1955 and 1959, although Mainland and foreign imports have varied from year to year.

Poultry meat. In 1959, the total volume of poultry meat marketed in Honolulu was 7.7 million pounds. Imports amounted to slightly over 5 million pounds, 12.4 percent more than in 1958. Between 1955 and 1959, poultry meat imports have shown a strong upward trend, having increased by 72 percent during the 5-year period. Local marketings during the same period, on the other hand, have fluctuated and increased by only 4.5 percent between 1955 and 1959.

Red Meats

In 1959, the total volume of red meats marketed in Honolulu was almost 50

million pounds, over 3 million pounds more than in 1958. Beef and veal amounted to 70 percent of the total volume marketed; pork, 27 percent; and lamb and mutton, 3 percent. The volume of red meat imports from Australia and New Zealand made the greatest gain in 1959, 29.9 percent more than in 1958. Mainland imports increased by 9.6 percent. State supply decreased by 1.9 percent, thus breaking an upward trend for the first time since 1955.

Beef and Veal. A total of 34.9 million pounds of beef and veal were marketed

ed in Honolulu in 1959, 2.4 million pounds more than in 1958. Forty-eight percent of this total, or 16.7 million pounds, was of state origin. Beef and veal imports from Australia and New Zealand in 1959 increased by 1.8 million pounds over 1958. Mainland imports increased by .4 million pounds and state marketings increased by only .2 million pounds.

Pork. The total volume of fresh pork marketed in Honolulu in 1959 was 13.6 million pounds, representing

an increase of nearly .6 million pounds over 1958. The volume of Oahu-produced hogs decreased by about .6 million pounds in 1959. However, Mainland imports increased by over 1 million pounds and foreign imports increased by .1 million pounds. Compared with 1958, foreign pork imports increased by 120 percent in 1959.

Lamb and Mutton. Marketings of lamb and mutton in Honolulu in 1959 were 1.4 million pounds. This represents a 17.8 percent increase over the average annual receipts between 1955 and 1959.
